Mitchell Technical Institute Articulation

Articulation is a cooperative effort between South Dakota's high schools, the Department of Education's Office of Curriculum, Career and Technical Education (OCCTE), and technical institutes. It links high schools with certificate, diploma, and associate degree programs and provides students with an opportunity to receive credit for skills previously learned. The courses listed below in the Information Technology career cluster are currently articulated from OCCTE approved programs to the Information Systems Technology program at Mitchell Technical Institute.

Articulation Guidelines

1. To receive articulated credit, the student must have completed the high school course within the last three years.
2. A minimum of a "B" in the course(s) to be articulated is required.
3. Tuition is not charged for the articulated credit(s).
4. Articulated courses will be honored by all post-secondary institutes for those course(s) that have common course names and numbers.
5. If the curriculum of the technical institute course changes, the terms of the agreement may also change.
6. All articulation agreements between secondary schools and the technical institutes reflect only the transfer ability of credit between these agencies and not with state universities.

Information Systems Technology

High School Information

Technology Cluster Courses

10053 Database Programming Standards
10101 Networking Technology
10102 Networking Systems
10109 Essentials of Operating Systems
10257 Introduction to Network Cabling

Additional High School Courses

Algebra II/Advanced Algebra plus 20+ on ACT Math or 45+ on COMPASS Algebra or 25+ on TABE Algebra

MTI Information Systems Technology Courses

CST 105 – SQL Database Management (1 of 3 credits)
CST 140 – CCNA I (1 or 5 credits)
CST 140 – CCNA I (1 or 5 credits)
CST 130 – A+ Core Hardware/Operating Systems (1 of 5 credits)
CST 110 – Network Media (1 of 3 credits)

MTI General Education Courses

MATH 101 – Intermediate Algebra (3 of 3 credits)
MATH 104 – Technical Mathematics (3 of 3 credits)
