Commencement Speakers

Clayton Sorensen

Clayton Sorensen's journey to Mitchell Tech began with a sense of certainty about his career goals, but it was during his visit that destiny led him down a different path. Guided by an insightful admissions representative, Clayton found his true calling in the Power Line Construction and Maintenance program and continued his education in Electrical Utilities and Substation Technology this year. The prospect of a job awaiting him back home in Vermillion sealed the deal. "I was the last person to get a spot in the class that year, so I felt like it was fate. I took it, ran with it, and I haven't looked back since," he said.

When he isn't climbing poles, Clayton said he enjoys hunting, fishing and spending time with friends. Describing himself as a "work horse," he plans to combine his dedication to farming alongside his father, his greatest source of inspiration, with a full-time position with a local electric cooperative. Looking ahead, Clayton envisions intertwining his career with his passions. "When I'm not working, I'll be doing what I love" – which echoes his father's wisdom to "find the thing you love and do it for the rest of your life, and you'll never be working."

Sydney Bauer

Sydney Bauer was born in South Dakota, grew up in Wisconsin, and returned to her roots in 2022 to pursue her education as a Medical Assistant. Drawn by the prospect of being closer to family, especially her two younger brothers, Sydney initially viewed her enrollment at Mitchell Tch as a trial run. However, it didn't take long for her to realize that she had discovered her place of belonging. "I turned out loving it here and I never want to leave," she said.

For Sydney, success isn't just about achieving personal milestones; it's about reaching a point where she can give back to her community. She envisions herself seated on stage, among the faculty, as a symbol of her professional attainment. Nurturing by nature, Sydney's desire to work in healthcare stems from a deep-seated urge to make a meaningful difference in people's lives- physically, emotionally and spiritually. Sydney draws inspiration from her aunt, Christy, whose resilience in the face of adversity serves as a guiding light. Sydney emphasizes the importance of recognizing one's intrinsic worth and purpose. "You matter, and there's a reason you're in the very spot you're in right now," she asserts, urging others to embrace their inherent value and potential.

Dominic Tucker

Dominic Tucker chose Mitchell Tech's Architectural Design and Building Construction program because it "offered the best possible options for working in the construction field." By doing so, he said he built a priceless network and knows the community's support is integral to his growth. "My friends hold me accountable as a student and in my faith."

His passion for construction was ignited during childhood outings with his father to explore luxurious homes showcased during the Sioux Falls parade of homes. "I wanted to be involved in building those homes, and I feel God has blessed me with the gift of leadership," Dominic shares, attributing his sense of purpose to what he perceives as a divine gift of leadership. Leading others has long been a dream for Dominic, a skill he believes aligns seamlessly with the dynamic nature of the construction field. After graduation, Dominic will be working in construction. In the future, he hopes to own a corporation with multiple businesses. Dominic wishes to leave his peers with this advice: "Be proud of yourself, be fearless, and be kind to everyone always."

Associate of Applied Science: a two-year degree with technical and general education coursework to promote entry into a specific career.

Diploma: a one-year achievement demonstrating completion of a field-specific course of study for entry into the workforce.

This program does not certify actual grade point average or degree completion.

Build Dakota Scholarship

Build Dakota Scholar

Awarded to students entering high-need workforce programs. These full-ride scholarships fund all program expenses. Scholarship recipients commit to living and working in South Dakota, in their field of study, for three years following graduation.

Honor Graduates

Gold Cords

** High Honors 3.75 - 4.00 GPA

Silver Cords

* Honors 3.50 - 3.74 GPA

Calculated using a cumulative GPA through the end of the 2023 Fall semester for the Associate of Applied Science degrees only.
