## Katelynn Scherff

Katelynn Scherff's path to Mitchell Technical College was shaped by her family's background in agriculture, along with her involvement in FFA, 4-H, and her experience working at her hometown vet clinic. She initially enrolled in the Animal Science program to become a veterinary technician. During her first internship, she worked at an equine veterinary clinic, which specialized in equine health and reproduction. "I knew this would be a new experience, as I would be working with horses instead of cattle, but Dr. Lori Repenning was incredibly supportive. She shared her own experiences from when she worked at an equine facility after graduating from veterinary school, which helped me immensely."

When Katelynn returned to college in the fall of 2024, she experienced a shift in her career direction. "During my fall semester, I developed a strong interest in animal nutrition and health." After completing courses in Livestock Nutrition, Feeds, and Animal Health and Disease, Katelynn was certain she wanted to pursue a career as a livestock nutritionist. She is currently gaining hands-on experience and expanding her knowledge at her internship, where she is furthering her expertise in the fields of animal health and nutrition.

One piece of advice Katelynn would like to share with her classmates is, "It's completely normal not to have your entire future mapped out. It's important to follow your aspirations and pursue what truly excites you."

## Avery VanOverbeke

Avery wasn't always sure where life would take him. Growing up, he thought he'd end up in a 9-to-5 office job. But the summer before his senior year, everything changed. He started working at an ethanol plant and discovered just how rewarding it felt to work with his hands. That experience got him thinking about careers that would let him be outdoors and do hands-on work.

Power lines quickly caught Avery's attention. Since he grew up next to the Big Stone Power Plant, he'd always seen crews out working on lines and improving the system. So, he started researching schools and ended up touring Mitchell Tech. By the time his tour was over, he knew this was the school—and career—for him.

When he's not up high on a pole, Avery spends his time riding his motorcycle, traveling, and hanging out with his younger brothers. He says the rush of the wind at the top of a pole reminds him of being on his bike—it's a thrill he loves. Avery grew up in Milbank, SD, but he's excited to explore new places while he's still young. Down the road, he hopes to settle down and own a farm like the one he grew up on. As his dad always says, "You can make as many plans as you want, but God has His plan for you."

## Joseph Creasy

Joe Creasy sought a brighter future through an education at Mitchell Technical College. Born and raised in Las Vegas, Nevada, Joe took a chance with Mitchell Tech and moved across the country, and he has not regretted his decision one bit. Joe has always been fascinated with health care and sciences, and when he learned he could combine the two, he decided that becoming a Radiologic Technologist would be perfect for him. Thanks to his degree, he can look at what's most important in people: what's on the inside.

Joe can be described as a workaholic and is always trying to stay occupied by helping others. His inspiration is his father, who, no matter how buried with work he is, always makes time for his family and others. Joe believes that happiness comes from reaching out and helping others. When one gets better, we all get better. When not at the hospital, he enjoys watching Formula 1 racing, weightlifting, and snowboarding in the winter months.
