## DRUG AND ALCOHOL TESTING FOR COMMERCIAL DRIVERS

Mitchell Technical College requires a drug- and alcohol-free learning and working environment. The College will make every effort to see that employees requiring a commercial driver's license (CDL) are operating vehicles in a safe manner.

A "driver" for purposes of this policy is defined as an employee who is required as a condition of employment to have a commercial driver's license.

Mitchell Technical College maintains a drug and alcohol testing program for these drivers to assure the safety of passengers, students, pedestrians, and other motorists, as well as the drivers themselves.

1/9/16 – Policy revised to focus on employees and not students, as well as to function separately from federal transportation regulations.
