Johnny Clark Jr.

John's path to Mitchell Technical College is unlike most. A traveling Licensed Practical Nurse (LPN) currently stationed in North Dakota and originally from Northern New York, John has always been driven by a passion for caring for others. He earned his nursing license in New York before heading to Florida, where he began his journey as a traveling nurse.

While living in Southeast Florida, John initially returned to school to pursue his Registered Nurse (RN) degree, but plans shifted due to COVID-19. As demand for healthcare workers grew, he began traveling, serving in eight states since 2020.

Although he hadn't planned to return to school, encouragement from fellow nurses—many of whom assumed he was already an RN—pushed him to take the next step. John applied to Mitchell Tech without knowing much about the program or area, but was excited for the opportunity.

During his time at Mitchell Tech, John has built strong friendships and developed lifelong skills that will support his future as an RN. His advice to others: "You can be anything you want to be, but the only person standing in your way of success is yourself. Step aside, follow your dreams, and make your life count."

Kamryn Shull

Kamryn Shull is a graduate of the Architectural Design & Building Construction program with a focus on residential building, where she values the creativity and endless possibilities that come with designing and building homes. She gained hands-on experience through two summer internships by assisting project managers, working with both a commercial construction company and a custom home builder.

Originally from Piedmont, South Dakota, Kamryn is the oldest of four siblings, a role that naturally developed her leadership skills, something she now carries into her career. Her passion for building started at a young age and was solidified in 2020 when she helped build the home her family lives in today, an experience that confirmed her desire to pursue a career in construction. She lives by the belief that "a dream without a plan is just a wish," a mindset that continues to guide her goals and work ethic.

Outside of the jobsite, Kamryn enjoys snowboarding, golfing, playing piano, and spending time on creative hobbies like watercolor painting, embroidery, and woodworking, interests that reflect both her creativity and attention to detail.

Sam Schneider

Growing up in western South Dakota, Sam has always been driven to work hard. From operating equipment on an excavation crew his freshman year of high school to assisting in the family HVAC business, a strong work ethic has shaped his path. After moving to the family farm in early 2023, Sam learned that having a great work ethic is essential in the real world, but realized agriculture wasn't the right fit for him.

Influenced by close family members, Sam chose to pursue Power Line Construction & Maintenance at Mitchell Tech. Excelling in his classes, he quickly rose to the top of the program. He strives to become an Ariel Lineman after receiving his Journeyman's Ticket.

Outside of school and work, Sam enjoys spending time with his family and friends, hunting, fishing, riding horses, and improving his roping skills. He also looks forward to traveling the country through his career and experiencing new places along the way. He is eager to see what God has in store for him. *"And we know that in all things God works for the good of those who love him, who have been called according to his purpose."* - Romans 8:28

Associate of Applied Science: a two-year degree with technical and general education coursework to promote entry into a specific career.

Diploma: a one-year achievement demonstrating completion of a field-specific course of study for entry into the workforce.

This program does not certify actual grade point average or degree completion.

Build Dakota Scholarship

Build Dakota Scholar

Awarded to students entering high-need workforce programs. These full-ride scholarships fund all program expenses. Scholarship recipients commit to living and working in South Dakota, in their field of study, for three years following graduation.
